

## Custom Services

Automate processes and audit trails  
Replace other systems and tools  
Create “A Single Version of the Truth”

---

All processes, approval systems and paperwork was replaced by customised components of a single salesforce.com instance, streamlining and speeding up systems, creating a single repository of business information and records.

Other tools were replaced, including project, product, HR and finance systems, saving time and money, and creating a seamless single cross-reference of company data, saving time, money and mistakes

## Service Deliverables

- Project management and status reporting
- Review existing business systems
- Prioritise business impacts
- Implement new systems
- Automate approval processes
- Migrate legacy data (hard and soft copies)
- Train staff
- Train business partners
- Review progress
